Career Strategy Plan

NAME:	
Career Field What career field are you pivoting from and to? *Example: Pivoting from Software Engineering to Data Science*	
Relevant work experience What previous relevant work experience do you have that could be transferable or closely related? *Example: project management experience, data analysis in excel, delivering presentations to leadership, etc.*	
Industry of Interests/ Dream Job(s) What industries are you interested in, and/or what would be your "dream job"? *Example: Working for a healthcare company*	
Years of Relevant Experience How many years of professional experience do you have?	
Years of Python Experience How many years of Python experience do you have? *Years of Python experience will help determine which track you'll pursue*	
Locations What locations do you want to work in, or are you limited to? *Example: San Francisco, Denver, or San Diego*	
Work Authorization Do you have local work authorization, or will you need sponsorship? *Example: I am a US citizen*	
Preferred Company Size Are you attracted to a small, medium, or large enterprise? *Example: I'd like to focus on companies with 100 employees or less*	
Desired Job Titles What Job titles seem like they could be the best fit for you based on what you've learned so far? *Example: Data Analyst or Data Scientist, etc*.	
Possible Capstone Topics What types of projects interest you and could make a good capstone? *Example: Developing an algorithm to predict and improve cancer detection.*	
Salary/Benefits limitations What limits or expectations do you have about salary and benefits? *Example: I'm the primary breadwinner in my family and need at least $75k to make a move worthwhile.*	
Time Commitment How much time each week are you prepared to give to your job search? *Example: About 4 hours per week now, more once the course is done.*
